We continually bring new items into our households without removing old items to accommodate them, which creates a home filled to capacity and beyond. Since 1970, home sizes in the United States have increased from 1,500 square feet to between 2,000 and 2,500 square feet. Today many homeowners have a two-car garage in which they cannot fit a vehicle because it serves as a storage area. Whatever does not fit in the home is packed away in a rental storage unit.

Consider a popular weight loss theory as a parallel:

if calories in exceed calories out, weight is gained;

if calories in are fewer than calories out, weight is lost; and if calories in equal calories out, weight is maintained. Is this not true of our living spaces?

Our bodies may stretch, but unfortunately for our homes, our closets do not!

As psychologists, we know only too well the vital role that beliefs and attitudes play in accomplishing any goal. More good intentions and great ideas are sacrificed (a)because limiting beliefs and negative attitudes than anything else we know. If you believe that you don't deserve \$1 million or (b) what you could never earn that much money, the likelihood of your ever having it quickly goes to zero. Relatively little (c) has been written about beliefs, attitudes and intention as they relate to the field of finances. Like everything else, there are healthy beliefs and attitudes (those that help you reach your goals) as well as unhealthy (d)ones (those that hold you back). The best thing about beliefs and attitudes is that they can easily be changed — more easily than people generally realize. While we may not have complete control over (e)that happens to us in the physical world, we do, in fact, have the power to choose what beliefs, attitudes and thoughts we cultivate.

① (a), (b), (d) ② (a), (b), (e) ③ (b), (c), (e)

④ (b), (d), (e) ⑤ (c), (d), (e)

When accurate, _____ keep you safe and make your life easier. For example, seeing storm clouds in the sky may prompt you to grab your umbrella, as you assume you may need it even though it's not raining at the moment. Noticing an expired date on your yogurt and assuming it's no longer edible may save you from having to use one of your sick days. Imagine how tedious it would be if you had to research and check out every minute detail of your day to make sure you had every piece of information available. No one has that much time! But as useful as _____ are, they can also get you into trouble. Not accurately processing the information in your environment or only seeing what you want to see can lead to incorrect assumptions.
