

고2_2209[기출문제] 23

다음 빈칸에 들어갈 말로 가장 적절한 것은?¹ [22년 9월 23번]

We have already seen that learning is much more efficient when done at regular intervals: rather than cramming an entire lesson into one day, we are better off spreading out the learning. The reason is simple: every night, _____ . This is one of the most important neuroscience discoveries of the last thirty years: sleep is not just a period of inactivity or a garbage collection of the waste products that the brain accumulated while we were awake. Quite the contrary: while we sleep, our brain remains active; it runs a specific algorithm that replays the important events it recorded during the previous day and gradually transfers them into a more efficient compartment of our memory.

- ① our brain discerns what we do not know
- ② our brain combines complicated issues in a day
- ③ the conventional learning process is combined in our brain
- ④ our brain unifies various learning processes of different people
- ⑤ things we have learned in a day are amalgamated into our brain

다음 글의 밑줄 친 부분 중, 어법상 어색한 것은?² [22년 9월 23번]

We have already seen that learning is ③much more efficient when ④done at regular intervals: rather than cramming an entire lesson into one day, we are better off spreading out the learning. The reason is simple: every night, our brain consolidates ⑤what it has learned during the day. This is one of the most important neuroscience discoveries of the last thirty years: sleep is not just a period of inactivity or a garbage collection of the waste products that the brain accumulated while we were awake. Quite the contrary: while we sleep, our brain remains ①active; it runs a specific algorithm that replays the important events it recorded during the previous day and gradually transfers ②it into a more efficient compartment of our memory.

- ① a
- ② b
- ③ c
- ④ d
- ⑤ e

다음 글을 읽고, 주어진 단어(구)를 사용하여 빈칸 (A)를 조건에 맞게 완성하십시오.³ [22년 9월 23번]

We have already seen that learning is much more efficient when done at regular intervals: rather than cramming an entire lesson into one day, we are better off spreading out the learning. The reason is simple: every night,

(A) _____.

This is one of the most important neuroscience discoveries of the last thirty years: sleep is not just a period of inactivity or a garbage collection of the waste products that the brain accumulated while we were awake. Quite the contrary: while we sleep, our brain remains active: it runs a specific algorithm that replays the important events it recorded during the previous day and gradually transfers them into a more efficient compartment of our memory.

our brain / information / the day / it /
process / learn / which / during

다음 글의 밑줄 친 ㉠~㉦ 중, 어법상 어색한 것만을 골라 바르게 짝지은 것은?⁴ [22년 9월 23번]

We have already seen that learning is much more efficient when ㉠done at regular intervals: rather than cramming an entire lesson into one day, we are better off ㉡spreading out the learning. The reason is simple: every night, our brain consolidates ㉢that it has learned during the day. This is one of the most important neuroscience discoveries of the last thirty years: sleep is not just a period of inactivity or a garbage collection of the waste products ㉣which the brain accumulated while we were awake. Quite the contrary: while we sleep, our brain remains ㉤actively; it runs a specific algorithm that replays the important events it recorded during the previous day and gradually ㉥transfer them into a more efficient compartment of our memory.

* consolidate: 통합 정리하다

- ① ㉠, ㉢ ② ㉡, ㉣ ③ ㉠, ㉤, ㉦
④ ㉡, ㉣, ㉤ ⑤ ㉢, ㉤, ㉦

정답

1 ㉟

2 ㉟

3 our brain processes information which it learned during the day

4 ㉟
