1 다음 글의 Thibodeau와 Broditsky의 실험을 표로 정리하고자 할 때, 빈칸 (A)~(D)에 들어갈 알맞은 말을 <조건>에 맞게 쓰시오.

Problem framing amounts to defining what problem you are proposing to solve. This is a critical activity because the frame you choose strongly influences your understanding of the problem, conditioning your approach to solving it. For an illustration, consider Thibodeau and Broditsky's series of experiments in which they asked people for ways to reduce crime in a community. They found that the respondents' suggestions changed significantly depending on whether the metaphor used to describe crime was as a virus or as a beast. People presented with a metaphor comparing crime to a virus invading their city emphasized prevention and addressing the root causes of the problem, such as eliminating poverty and improving education. On the other hand, people presented with the beast metaphor focused on remediations: increasing the size of the police force and prisons.

	People presented with the virus metaphor stressed (D)_____ and dealing with the root causes
(4)	of crime while others provided with the beast metaphor mentioned remediations such as expanding the police power and jails.

<조건>
(A)~(D) 모두 한 단어로 서술할 것
반드시 본문에서 찾은 단어로 서술할 것 (변형하지 않음)

(A) _____

(B) _____

(C) _____

(D) _____

Thibodeau and Broditsky's experiments	
Conclusion: The frame people adopt determines which (A)_____ they will take to resolve a problem.	
Process of the experiments	
(1)	People were asked how to decrease (B)_____ in a community
(2)	Two different metaphors were used to express offence.
(3)	Experiment participants' proposals (C)_____ depending on the metaphors.

2 다음 글의 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

As the technological revolution gathers pace, education and training are thought to be the answer to everything. They are, but we have to understand the question. Educating more people – and to a much higher standard – is vital. But we also have to educate them differently. The problem is that present expansion is based on a fundamental misconception: _____ . For years academic ability has been conflated with intelligence, and this idea has been institutionalised into testing systems, examinations, selection procedures, teacher education and research. As a result, many highly intelligent people have passed through education feeling they aren't. Many academically able people have never discovered their other abilities.

- ① equating academic ability to intelligence
- ② expanding education at the expense of enjoyment
- ③ raising standards by adapting to technological advances
- ④ setting up an institution to do research for academic ability
- ⑤ narrowing the gap between rich and poor through education

11 다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?

Food marketing is advertising that promotes the sale of certain food or food products through various means. Food preferences develop at a very early age, primarily through learning processes. Once established, these eating patterns are difficult to change. Parents are a key influence in the early development of food preferences; however, outside influences become increasingly important, especially during middle childhood and adolescence. Food marketing promotes highly appealing, but unnourished, products to youth. Many foods and drinks that are marketed can contribute too much sodium, sugars or saturated fat to our eating patterns. The overexposure to food marketing causes a public health problem to youth. In addition, food marketing can take on many forms. Newer forms of marketing like sponsored posts on social media can be more difficult to recognize. This can make it even more difficult to make beneficial food choices.

↓

(A)_____ in various forms affects youth without their noticing and eventually contributes to (B)_____.

(A)

(B)

- | | |
|-------------------------|----------------------------|
| ① Social media | buying in bulk |
| ② Parental interference | gaining weight easily |
| ③ Parental interference | junk food preferences |
| ④ Food marketing | revealing personal data |
| ⑤ Food marketing | unhealthy food consumption |

12 다음 빈칸에 들어갈 수 없는 것은?

Food marketing refers to any activity conducted by a company in the food, beverage, or restaurant industry to encourage purchase of its products. Food preferences develop at a very early age, primarily through learning processes. Once established, these eating patterns are difficult to change. Parents are a key influence in the early development of food preferences; however, outside influences become increasingly important, especially during middle childhood and adolescence. Food marketing promotes highly _____, but unhealthy, products to youth. The overexposure to food marketing presents a public health issue to youth. Unlike tobacco and alcohol consumption, young people do not need to learn that consuming these foods is rewarding. From birth, humans prefer the taste of foods high in sugar, fat, and salt (i.e., the foods most commonly advertised).

- ① tempting ② balanced ③ preferred
 ④ appetizing ⑤ mouthwatering

13 다음 글의 밑줄 친 부분 중 문맥상 낱말의 쓰임이 적절하지 않은 것은?

Media plays a role in today's obesity rates. TV shows, movies, and Web sites advertise specifically to children and teenagers. It may seem unbelievable that ①advertising can cause people to be overweight. However, ads make obvious (as well as subtle) suggestions about what to eat, buy, or how to live. Food advertising causes people to remember a catchy saying like "I'm Lovin' it!" for McDonald's. It is this kind of advertising that makes people ②crave the food that is marketed to them. Unfortunately, a lot of fast food is high in fat, sugar, and salt — all of which causes weight ③gain. If children and teenagers get the message from advertising that this food is good and should be eaten on a regular basis, it can help lead to obesity at a young age. It is no wonder that parents and doctors are worried. When children and teenagers watch television, they are getting ④negative messages about many unhealthy food choices. The media that children and teenagers watch and pay attention to the most is the ⑤same media that companies use to sell their unhealthy food.

- ① a ② b ③ c ④ d ⑤ e

Nutrition and quality of air are two of the most important drivers of good overall health. Make a wall with several vegetable boxes hung from one another and install it next to an outdoor living area or near a window, and you'll be getting a good dose of both elements. Living wall gardens, full of plants that breathe in carbon dioxide and breathe out oxygen, are a fantastic way to help filter the air surrounding a living area. This oxygen reaches a city dweller with a living wall if he or she is sitting on the balcony or sitting inside the home with the window open. Having a view of the vertical wall garden from the interior of the home will both reduce stress and increase the green view. Most importantly, growing vegetables in the garden means that you will also be providing nutritionally sound food for you and your family, so the living wall provides extensive benefits beyond simple beauty.

- ① 벽 정원은 이웃에게 질 좋은 공기를 제공할 수 있다.
- ② 정원에서 채소를 재배하는 것은 가족에게 영양분이 풍부한 음식을 제공할 수 있다.
- ③ 스트레스를 줄이기 위해 녹색 경관을 봐야만 한다.
- ④ 공기의 질을 향상하기 위해 채소로 외벽을 아름답게 꾸며야 한다.
- ⑤ 채소 상자로 만든 벽 정원은 경관과 건강에 이점을 제공한다.

Green walls have become a rising new trend in the built environments in recent years. Incorporating living nature and vegetables into urban environments not only looks much more inviting, but also has a number of other benefits. One of the most significant benefits of a green wall is to improve the quality of your indoor air. ㉠Plants on the wall filter toxins in the air and convert carbon dioxide to oxygen. ㉡If you thought normal gardening could be messy, indoor living walls can lead to even messier muddy floor. ㉢Studies have also shown that living walls can decrease negative behaviors, such as aggression and anxiety, reducing stress. ㉣This is due to the automatic reaction of our bodies to seeing and being around natural elements. ㉤Most importantly, growing vegetables in the walls means that you will also be providing nutritionally sound food for you and your family.

Every nation was said to have its own deep-rooted identity, its "national soul." Folk music was believed to be the clearest expression of the national character, a typical feature enshrined in every nation. This interpretation of the meaning of folk music became dogma for nationalistic music ideologists. A natural outgrowth of this way of thinking was the idea that _____, in as much as music reflecting the national character has always existed in folk song. Composers simply have the task of unveiling that character, of refining it, and of raising it to a higher artistic level. Their main concern must be to listen carefully and to polish the rough musical voice of their people.

- ① nature alone can create music of any worth
- ② a nation's music is not created but discovered
- ③ folk music cannot be defined by territorial homogeneity
- ④ musical creativity can be viewed as a biological adaptation
- ⑤ folk music is no longer judged exclusively in terms of its national character

29 다음 빈칸에 들어갈 말로 가장 적절한 것은?

The idea that folk music is a product of nature played an important part in the rise of musical nationalism, and it was part of the complex of ideas at the root of romantic nationalism. In the Ferman Romantic movement, the folk song was considered an expression of the "purely human." Instead of being universal however, that expression was thought to vary from one nation to the next. Folk song was considered a reflection of the particular mystical characteristics of a people and to go back to times immemorial. In this scheme, the _____ of mankind into nations was a natural fact. Every nation was said to have its own deep—rooted identity, its "national soul." Folk music was believed to be the clearest expression of the national character, a typical feature enshrined in every nation.
