주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은?¹

[고1 2019년 11월 모의고사 33번]

Focusing on the differences among societies conceals a deeper reality: their similarities are greater and more profound than their dissimilarities.

(A) This difference may seem large, and you might focus your attention on what local forces, such as erosion, account for the difference in size. But this narrow perspective misses the opportunity to study the other, more significant geological forces that created what are actually two very similar mountains, one 10,300 feet high and the other 10,900 feet.

(B) Imagine studying two hills while standing on a ten-thousand-foot-high plateau. Seen from your perspective, one hill appears to be three hundred feet high, and the other appears to be nine hundred feet.

(C) And when it comes to human societies, people have been standing on a ten-thousand-foot plateau, letting the differences among societies mask the more overwhelming similarities.

- ① (A)-(C)-(B) ② (B)-(A)-(C)
- ③ (B)-(C)-(A) ④ (C)-(A)-(B)
- ⑤ (C)-(B)-(A)

다음 글의 괄호 (A), (B), (C) 안에서 문맥에 맞는 표현으로 가장 적절한 것은?² [19년 11월 33번]

Focusing on the differences among societies conceals a deeper reality: their similarities are greater and more profound than their dissimilarities. Imagine studying two hills while standing on a ten-thousand-foot-high plateau. Seen from your perspective, one hill appears to be three hundred feet high, and the other appears to be nine hundred feet. This difference may seem (A)[considerable / tiny], and you might focus your attention on what local forces, such as erosion, account for the difference in size. But this narrow perspective misses the opportunity to study the other, more significant geological forces that created what are actually two very (B)[similar / different] mountains, one 10,300 feet high and the other 10,900 feet. And when it comes to human societies, people have been standing on a ten-thousand-foot plateau, letting the differences among societies (C)[conceal / reveal] the more overwhelming similarities.

- | (A) | (B) | (C) |
|----------------|-----------|---------|
| ① considerable | similar | conceal |
| ② considerable | different | reveal |
| ③ considerable | similar | reveal |
| ④ tiny | different | reveal |
| ⑤ tiny | similar | conceal |

다음 글의 주제로 가장 적절한 것은?¹⁰ [2019 11월 고1 모의 33번]

Focusing on the differences among societies conceals a deeper reality: their similarities are greater and more profound than their dissimilarities. Imagine studying two hills while standing on a ten-thousand-foot-high plateau. Seen from your perspective, one hill appears to be three hundred feet high, and the other appears to be nine hundred feet. This difference may seem large, and you might focus your attention on what local forces, such as erosion, account for the difference in size. But this narrow perspective misses the opportunity to study the other, more significant geological forces that created what are actually two very similar mountains, one 10,300 feet high and the other 10,900 feet. And when it comes to human societies, people have been standing on a ten-thousand-foot plateau, letting the differences among societies mask the more overwhelming similarities.

- ① changes of local forces causing geological difference
- ② similarities veiled by focusing only on the differences
- ③ roles of geological forces in topographic height of mountains
- ④ reasons why people tend to concentrate on similarities among societies
- ⑤ significance of defining differences among societies in exploring hidden reality

다음 글의 내용을 한 문장으로 요약하고자 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은?¹¹ [H1-1911 33번]

Focusing on the differences among societies conceals a deeper reality; their similarities are greater and more profound than their dissimilarities. Imagine studying two hills while standing on a ten-thousand-foot-high plateau. Seen from your perspective, one hill appears to be three hundred feet high, and the other appears to be nine hundred feet. This difference may seem large, and you might focus your attention on what local forces, such as erosion, account for the difference in size. But this narrow perspective misses the opportunity to study the other, more significant geological forces that created what are actually two very similar mountains, one 10,300 feet high and the other 10,900 feet. And when it comes to human societies, people have been standing on a ten-thousand-foot plateau, letting the differences among societies mask the more overwhelming similarities.

↓

When it come to human societies, focusing on the (A)_____ among societies (B)_____ a deeper social reality.

- | | (A) | (B) |
|------------------|-----|------------|
| ① diversities | | modifies |
| ② similarities | | reveals |
| ③ differences | | displays |
| ④ distinctions | | constructs |
| ⑤ universalities | | obscures |
