

# OPERATING AND INSTALLATION MANUAL

• I T E M : DUPLEX WIRELESS INTERPHONE

• MODEL : WI-1000 L

## • SPECIFICATION

|                   |                       |
|-------------------|-----------------------|
| Electric Source   | AC 127V/220V, 50~60Hz |
| Power Consumption | 4.0w                  |
| Signal Sound      | Electronic Toning     |
| No. of wires      | No Wire               |
| Range             |                       |
| Frequency         | 270 ~ 390KHz          |
| Modulation Method | F.M                   |

## • FEATURES:

1. Station full duplex and paging system.
2. Easy to install-simply plug in at any convenient location.
3. Specially designed circuitry featuring high sensitivity and reduced noise interference.
4. Compact and slim, it can easily be used on table or wallmounted.
5. Pleasant tremolo call sound.

## • HOW TO OPERATE:

1. Simply insert plug into nearest socket.
2. Adjust volume control for call signal and paging. (option)
3. Lift handset and press the call button switch to talk the other party.
4. Full duplex conversation feature speeds communication.
5. Simply replace handset when conversation is over.

## • OPERATION RANGE:

Communication between operated locations on the same power transformer.  
Avoid locations where there is a sub-transformer between them.

## • DRAWING OF INSTALLATION

※NOTICE: Do not use this unit nearby  
computer and T.V (noise problem can be happened)
